STUDENTS' UNION REPORT

Football, once again, was the big event for the kick-off of the 1969-70 school year. In connection with football, an Ugly Mohawk Contest was held to raise money for the United Fund.

A Coffee House was held November 7, in our cafeteria, with the Folk Society performing.

On November 19, the Awards Assembly was held in the gym.

Many dances, sponsored by the Students' Union, were held during the year. These dances included a Christmas Prom and a Western Dance; both enjoyed immensely by students. The big dance of the year was held November 28, featuring Barry Allen.

A special committee, #21, was successful in obtaining a 10% discount on merchandise at Scott's Men's Wear, Tip Top Tailors, Poise-N-Ivy, and Joy's Styles.

December 23 was the date set aside for a Christmas Assembly to start the Christmas Holidays.

Social dancing was returned to the school for another year to prepare grade twelves for Graduation. The dates for graduation this year were May 29 and 30.

The annual St. Patrick's Day Tea, held March 18, was thoroughly enjoyed by all who attended. A radio raffle for MHHS students was held in conjunction with the Tea.

A proud moment for MHHS was had when the Girls' Volleyball Team won the Provincial "A" Title.

A new feature of our school was the addition of vending machines set up near the cafeteria.

Two evenings of one-act plays were held April 9.

The Students' Union Executive and council send best wishes for the future to all students.

A. & B. STEEL & ALUMINUM LTD.

Principal's Message

This year 1969/70 has been a good year for the Medicine Hat High School. Our football, basketball, badminton and volleyball teams have given a fine account of themselves, both as players and ambassadors as they travelled about the province. Our band has added much to our enjoyment at assemblies, as well as gaining recognition at the music festival. During the year, a group of Business Education students known as "BEVS" has provided excellent clerical assistance to teachers in need of typing.

In May, the Drama Club in cooperation with the Band, produced the first musical the Medicine Hat High has attempted. The Keyettes and Students' Union sponsored a most successful tea, while Key Club members have served faithfully about the school. Our ably-edited school paper has brought to our attention matters of interest and controversy. The Yearbook Committee has once again provided with a fine storehouse of memories, nor should we forget the many hours of faithful work put in by the Students' Union on our behalf.

Results of the January Departmental examinations indicate that our scholastic achievement is at a high level. Cooperation between staff and students has never been better.

Those who graduate can look back on their high school days at M. H. H. S. with some pride, knowing that they helped in no small way to build a very effective learning area. It is our hope that you will visit us when passing this way. We have enjoyed having you with us and we'll miss you when you leave.

Principal,
Mr. G. S. Grant

President's Message

Each year, in each edition of our yearbook, the President of the Students' Union has a chance to leave a few words with the students of the school. Usually, what this final message turns out to be, is no more than a "thank-you and good luck" type of message. I would like to make my few words, hopefully, more helpful.

I cannot say that the passed term was a great success for the M. H. H. S. Students' Union. New ideas materialized; some advantageous to the S. U., other failing in their purpose. But how else can we move forward without trying new ideas to see if they work? It seems to me that the trial and error method is the most realistic means of finding out if something is feasible or if it is not.

During the passed school year, I hope that the activities presented for you by your Students' Union pleased you. We tried, in a democratic way, to guide the S. U. down a road of success. But we had new guidelines to follow. There were few people who willingly gave their time to aid in some project, and even fewer who would give their opinions. If a Students' Union is to be successful, it must be, as the name implies, a strong union of every student in the school.

To you students who will be attending this high school next year, may I say this. Make your life at this school exciting and enjoyable; take part in the activities here for you and strongly support your new Executive and the Students' Union.

I have enjoyed my school life at M. H. H. S. and also being your President. But I believe I would have failed many times in my efforts, if it had not been for Mr. Armstrong's moral support and helpful ideas. I hope that those graduating go on to higher goals and those remaining uphold the letters, "M. H. H. S."

STEVE WELLING
President

Mrs. D. E. Jones
Mr. T. W. Lazenby
Mr. L. N. Little
Mrs. K. Pratt

Organist — Lois Katherine Miller

Valedictory Address

Mr. Chairman, Honored Guests, Parents, Teachers and Fellow Graduands:

There's a new world coming and it's just around the bend - there's a new world coming, this one's coming to an end. Calgary Herald, "Scientists Predict Only Ten Years of Life Remain - Pollution", New York Times, "Kent, Ohio: Four Dead As Students Demand Change", Saturday Night, "Inflation - Unemployment Rising".

Yes, class, we are looking forward to a new world, but what does this new world offer us and what is our contribution going to be? As we leave the protective walls of high school we enter a world which is confusing and filled with problems. A world which seems bent on self-annihilation. Social revolutions, pollution, war, unjust higher educational systems, inflation and many other problems plague us. We must accept the challenges of these problems.

A world-wide revolution is occuring today - a revolution which is vastly different from historic struggles. For one of the first times in history it is not a revolution which stems from the poor and hungry but exists in almost every home that has young people. The rising generation demand changes in many of the important branches of society. Changes in government - youth today want forceful restrictions on the carefree ways of strike action. Today, everyone is going on strike - if this carries on the country's economy will sink lower than it is now. We say, down with inflation, down with some of these futile strikes and up with a better, more secure life: next, we want changes in the social norms - long hair on boys is still not accepted, the manner in which young people sometimes dress is not accepted - an individual is frowned upon, both in the way he presents himself and the way in which he appears. We need people, individuals to initiate ideas and thoughts; therefore, in order to change social norms we must keep protesting those rules which we feel are wrong and unjust; finally we need and want changes in the environment - let us make clear the consequences of pollution to prove to people what their new world is going to be like, hoping to make them aware. This school has given us the knowledge; has taught us to evaluate, make decisions, and take an active part in society - and this is what we must all do!

Unfortunately, impatience often tends to be a characteristic of youth. In many countries, including our own, the younger generation wanting extreme change, protest, riot and take violent measures in order to force change and initiate their ideas. Most of us cringe at reports of the unnecessary deaths of students. We say there must be other methods. There are other methods! As graduating students we have the knowledge and the opportunity to take other measures. We must maintain patience and understanding, for violence breeds only chaos and disorder; now we gradually but constantly ask and work for changes.

Through graduating we enter a totally different world. Do you know what we face?

For one: we face wars: Wars have occurred over and over again in history. Today there are more wars than ever before. When are these exhausting wars going to stop? What can we do? Students all over the world are protesting. Young people in United States are accusing President Nixon of reneging on his promise to lead the nation "forward together". Because of their rioting students are being shot at, locked up and muzzled until no

more protests are heard. Are people so blind to the fact that it is us - the young people - who must fight these wars - why can't we protest and try to end the wars? In our society we are aware of today's pressing problems but people are willing to sit back until these problems actually affect them, at which time they demand action - but then, of course, it's too late. Everybody has the time, but nobody makes time. We must make time - ask questions - demand answers - demand them not violently but peacefully.

Secondly: we face unjust higher educational systems. In each university, a student council is elected or appointed whose purpose is to represent the student body. But just who runs the student council - not the elected students, but the faculty of the university itself. Students ought to be more in the decision-making procedures of their institutions. We are the principal consumers of higher education and we are entitled to be heard - and heeded. There are, however, certain decisions to be made in which students are not well qualified to participate. But even faculty boards usually pass on technical questions, demanding swift answers, to committees of experts. There is also a lack of clear cut responsibility and authority, resulting in the diffusing of decision-making. As graduands and students we want this changed - we want to have more of a voice in the affairs of our institutions. This will be changed as we now have the voice and experience to stand up and state our views. We must demand change - this is no time to sit back and say nothing.

Finally, as I mentioned before, we face pollution; we are being pushed into an environment which will, eventually, be destroyed by filthy air, contaminated water and poisoned soils. When we were brought into this world several years ago, it was already polluted. Polluted and dying without our help, but do you realize that today people in other parts of the world are dying from simply eating fish - poisoned from the mercury in polluted water! No one seems to bother until the situation is close to home . . . . . it's closer than you think. Students demand action, demand change. Stand up and question, " Why are those people dying? " Someone has to do something. Do you want to stand by and do nothing - it's now - it's our time - it's our voice that's going to be heard - it's the young generation - OUR generation.

Yes, a new world is coming but I really wonder is anything going to improve? Are you concerned enough? Really graduands, how can a new world evolve with all these riots, more wars than ever before, pollution that's killing us, and a governmental system that's forcing us into inflation? We must do something. Abstainers we don't need or want, participators are in demand!

I must admit that this world I speak of sounds pretty dismal. But it doesn't have to be dismal . . . . . .

There's a new voice calling, you can hear it if you try - it's a fresh voice, a new voice, a young voice - OUR voice.

It's growing stronger . . . . we have so much to be thankful for and better times to look forward to. It has been the parents and teachers, the other generation, who have made us more aware, knowledgeable, concerned, and capable to cope with the many problems that have always been with any generation. It is because of you, Mom and Dad, that we are here tonight ready now to face the world.

There's a new day dawning, rising clear, sweet and free. That day belongs to you and me. Graduands, make that day - together with harmony and understanding, sympathy and trust; no more falsehoods or derisions but a mystic crystal revelation. We are aware of what we must do.

Yes, there's a new world coming, the one we've had visions of, coming in peace, coming in joy, coming in love.

D. Charlton.

Music by The Big Band

THERE'S A NEW WORLD COMING

There's a new world coming and it's just around the bend,
There's a new world coming, this one's coming to an end.
There's a new voice calling, you can hear it if you try,
And it's growing stronger with each day that passes by
There's a brand new morning rising clear and sweet and free
There's a new day dawning that belongs to you and me
Yes, a new world's coming the one we've had visions of
Coming in peace, coming in joy, coming in love.
